Drilling at the Al Hariqah project continues to intersect gold mineralization over significant lengths. Hole RDH 46 is mineralized from surface to the end of hole at 78 meters with an average grade of 3.08 grams of gold per tonne. Included within the hole is a 12 meter high grade section which averaged 12.4 g/t gold. This hole has been extended to 151.08 meters by core drilling to test the depth extension of this mineralization.

Chad Ulansky, the Company’s President, is currently on site at Al Hariqah and is pleased to report that deepening of 31 percussion holes by core drilling is progressing well. Cantex’s operations have not been affected by current events in the Middle East and North Africa.
